Highlights

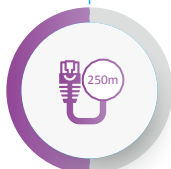

PoE Watchdog (PD Alive)

It offers 24/7 real-time monitoring PD (power device) status. If a PD crashes, the switch will automatically detect the failure and restart the device. This feature can save users time and avoid the hassle of manually restarting the IPC.

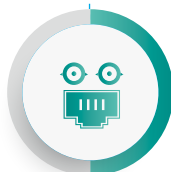

BT 90W (Red Port)

Our PoE switches are in compliance with the latest international standard IEEE 802.3bt and can provide 90W PoE output. High-power PDs (up to 90W) are now supported by our red port PoE.

Long Distance PoE

Breaking the 100m limitation, the Dahua PoE switch series can deliver a 250m long distance transmission. It can adapt to many challenging locations and offers cost-effective installation.

Intelligent PoE

Each port of Dahua PoE switches is differentiated by priority. If the power supply doesn't meet the power consumption, our switches will instantly detect the problem, guaranteeing the stable operation of crucial devices.

Products

Desktop PoE Switch

Hardened PoE Switch

Industrial PoE Switch

All-gigabit PoE Switch
